

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

this admirable contrivance gives to one whose problem includes night after night the provision for work in halls of many dimensions. But besides having to carry screens of different sizes, the operator needed heretofore three or four pairs of objectives of different powers, a matter of great expense, besides the cumbersome task of packing and unpacking several sets of glasses.

The multifocal attachment not only dispenses with the burden and expense of additional objectives, but also furnishes a picture more nearly PERFECT than the best combination gives without it, never disturbing the equilibrium of the system of lenses, but adding new powers of definition with entire freedom from distortion of lines and color dispersion.

This attachment can be furnished in three graded powers to suit different objectives.

A varying size of picture on the same screen is sometimes desirable. When a portrait or statue is to be shown, it might be desirable to have it relatively larger or smaller than the scale

of the landscape views. To effect this formerly required a change of objectives and an unpleasant interruption; but with the new attachment the statue may be shown life-size or colossal, and a portrait can be reduced to precisely the best size for life-like presentation.

The phantasmagoria effect with the MULTIFOCAL ATTACHMENT is now possible without moving the lantern backward or forward. Simply by increasing the distance of the multifocal system, the picture can be reduced to a disc of light of a few inches diameter, and slowly or rapidly enlarged to cover the whole screen. In scientific demonstrations the operator sometimes needs a sharpened pencil of light or a parallel beam. Such wants are readily met by this wonder-working improvement. All workers with the lantern should know about it, as they will appreciate what can be accomplished with it in covering all perplexities in the distance and size of picture on the screen.

CALENDAR.

Biological Society, Washington.

April 16.—C. W. Stiles, Notes on Parasites: *Tænia ovilla* in its Relation to Blanchard's Classification; F. V. Coville, The Flora of the High Sierras of California, New Plants from California, Nevada, and Utah; Erwin F. Smith, A Review of Baillon's Botanical Dictionary; J. N. Rose, Mexican Leguminosæ with Notes on Dr. Palmer's Collection.

Society of Natural History, Boston.

April 20.—John Murray, Some Recent Investigations into the Physical and Biological Conditions of the Locks and Fjords of the West of Scotland; E. Adams Hartwell, An Elevated Pot-Hole at Fitchburg, Mass.; George H. Barton, Additional Notes on the Drumlins of Massachusetts.

Exhaustion

Horsford's Acid Phosphate.

A wonderful remedy, of the highest value in mental and nervous exhaustion.

Overworked men and women, the nervous, weak and debilitated, will find in the Acid Phosphate a most agreeable, grateful and harmless stimulant, giving renewed strength and vigor to the entire system.

Dr. Edwin F. Vose, Portland, Me., says: "I have used it in my own case when suffering from nervous exhaustion, with gratifying results. I have prescribed it for many of the various forms of nervous debility, and it has never failed to do good."

Descriptive pamphlet free.

Rumford Chemical Works, Providence, R. I.

Beware of Substitutes and Imitations.

CAUTION.—Be sure the word "Horsford's" is on the label. All others are spurious. Never sold in bulk.

*New Method of Protecting Property
from Lightning.***The Lightning Dispeller.**

Price, \$20 to \$30.—According to size.

The Patent Lightning Dispeller is a conductor specially designed to dissipate the energy of a lightning discharge,—to prevent its doing harm,—placing something in its path upon which its capacity for causing damage may be expended.

No recorded case of lightning stroke has yet been cited against the principle of the Dispeller. So far as known, the dissipation of a conductor has invariably protected under the conditions employed.

Correspondence solicited.

Also have choice bargains in **Farm, Hop, Hay and Garden Lands.** Correspondence Solicited regarding Western Washington. All inquiries answered promptly. Address

A. C. SICKELS, Tacoma, Washington.**QUERY.**

Can any reader of *Science* cite a case of lightning stroke in which the dissipation of a small conductor (one-sixteenth of an inch in diameter, say,) has failed to protect between two horizontal planes passing through its upper and lower ends respectively? Plenty of cases have been found which show that when the conductor is dissipated the building is not injured to the extent explained (for many of these see volumes of Philosophical Transactions at the time when lightning was attracting the attention of the Royal Society), but not an exception is yet known, although this query has been published far and wide among electricians.

First inserted June 19. No response to date.

N. D. C. HODGES,**874 BROADWAY, NEW YORK.****SCIENCE****The Illustrated Popular Science Weekly.****TENTH YEAR.**

More than Two hundred of the leading scientific men and women of America have agreed to contribute to the paper during the coming year; and, as others are constantly joining in this move, to make the paper more valuable than ever, it cannot be long before there will be a body of five hundred competent users of this weekly medium of scientific discussion.
